Since 1980

## Eveline

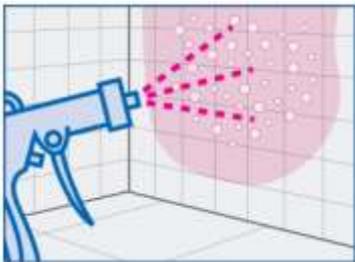

The system for complete  
cleaning and sanitizing  
of 100-200sqm furnished areas

# Eveline: Santoemma system to get area

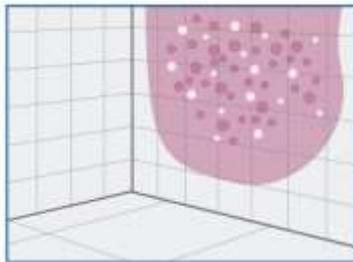

**Eveline** is the Santoemma patented system for complete cleaning and sanitizing of 100-200 square meters furnished places, with areas of different type: restrooms, working areas, offices, walkways, store-rooms, changing rooms, kitchens, café and restoration areas. Eveline allows to perfectly clean and sanitize vertical surfaces, sanitary fixtures and hard floor. The battery-powered version, with no power-cord, allows the operator to use the machine fast and easily everywhere.

## Phases of Eveline cleaning and sanitizing system :

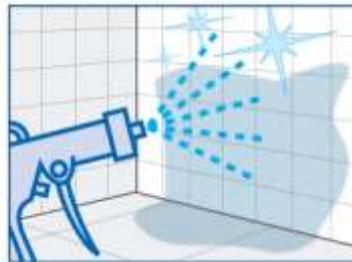

- 1 **Spraying** of chemical solution on all the surfaces (walls, sanitary fixtures, hard floor)
- 2 **Chemical action** against dirt and bacteria (30 seconds are enough)
- 3 **Rinsing** with clean water, to remove dirt and bacteria from the vertical surfaces
- 4 **Vacuumping** of residual liquid from floors.

1 **Spraying**

2 **Chemical action**

3 **Rinsing**

4 **Vacuumping**

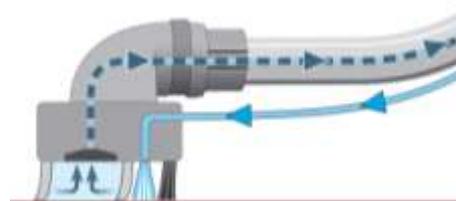

The **spray gun** allows to spray concentrated chemical solution and to rinse vertical surfaces, walls and sanitary fixtures.

The **special wand** supplied allows to clean hard floor with the injection-extraction system. A dedicated bristle, located on the vacuum head, allows to brush effectively very dirty hard floors.

The dirt detached from the floor is **completely removed** thanks to powerful vacuuming and is collected in the recovery tank.

To clean hard floors it is possible to spray and vacuum simultaneously, or to spray, brush and then vacuum afterwards.

In both cases hard floors are left perfectly dry in few seconds and without effort.

**Eveline** really **removes the dirt** from walls and hard floor without leaving any residual dirt on the surfaces and **represents today the ideal solution, replacing manual equipment** which move dirt and bacteria from place to place.

# s cleaned, sanitized, dried and perfumed

**Eveline** is the optimal solution for any 100-200 square meters furnished areas, such as for example: restaurants, holiday farms, fast-food outlets, pubs, discotheques, petrol stations, offices, factories, private companies, shops, shopping centers, cinemas, theatres, hospitals, nursing homes, kindergartens, schools, universities, ferries, cruise ships, airports, fitness centers, swimming pools, saunas, spa, hotels, pastry shops, bakeries, supermarkets.

## Advantages of Eveline:

- **Complete cleaning and sanitizing.** The chemical solution sprayed acts on all the surfaces, ensuring both cleaning and sanitizing also in corners not easily reachable with manual tools. Laboratory tests certify that Eveline eliminates **99.9% of bacteria**.
- **Greatest hygienic safety for the operator**, who does not come in touch with the objects and the surfaces to be cleaned.
- **Reduced labour for the operator.** Manual work is reduced to a minimum, since the dirt is removed by the solution chemical action and the following rinsing and vacuuming.
- **Ease of use.** Using the machine is very simple and does not require any training for the operator.
- **Saving of time.** Any place can be completely cleaned, sanitized and dried in less than one third of the time required with manual tools.
- **Saving of chemical.** Chemical is used without wastage because it is automatically dosed by the machine in an optimal quantity.
- **Easy use everywhere.** The operator can work fast and easily everywhere.

# Technical data and performance

	<b>Eveline (Cable version)</b>	<b>Eveline-Battery (Battery version)</b>
Recovery tank capacity:	14 litres	14 litres
Clean water tank capacity:	14 litres	14 litres
Approximate performances and consumption (50 sq. meters of hard-floor):	Time: <b>10 minutes</b> Chemical consumption: 200 gr Water consumption: 14 litres	Time: <b>10 minutes</b> Chemical consumption: 200 gr Water consumption: 14 litres
Tank construction:	High density polyethylene	High density polyethylene
Vacuum motor:	2 stages	2 stages
Power:	1000 W	500 W
Maximum waterlift:	2200 mm H <sub>2</sub> O	1300 mm H <sub>2</sub> O
Maximum air-flow:	50 l/sec.	45 l/sec.
Pump with bypass:	Vibrating	Membrane
Power:	2x70 W	40 W
Maximum pressure:	5 bar	2,8 bar
Maximum water-flow:	2,5 l/min	3 l/min
Cable:	10m	-
Weight (machine body):	18,5 Kg	41 Kg
Weight (packaged machine):	25 Kg	48 Kg
Dimensions:	cm 30 x 74 x 88 (h)	cm 30 x 74 x 94 (h)
Package dimensions:	cm 36 x 60 x 76 (h)	cm 42 x 65 x 94 (h)
Spray hose/Vacuum hose length:	3/3 m	3/3 m
Standard colors:	blue	blue
Batteries:	-	2 x 12V – 20Ah
Battery charger:	-	On board – 4A
Standard tools supplied with the machine:	Spray hose, vacuum hose, spray/rinse gun, wand for hard floor vacuuming and injection-extraction cleaning	Spray hose, vacuum hose, spray/rinse gun, wand for hard floor vacuuming and injection-extraction cleaning

## Chemicals

SANI-CLEAN-1	Cleaning and sanitizing chemical, 1 liter bottle
SUPER-CLEAN-1	Strong degreasing chemical, 1 liter bottle
ACID-CLEAN-1	Acid chemical, 1 liter bottle
T-CLEAN-1	Non-foaming chemical specific for textiles, 1 liter bottle

## Optional accessories

NS10PN	Transparent plastic hand tool
NS270N	Wand for carpet and hard floor, with aluminum head
HERMES	Wall and window cleaning tool, with 2 internal spray nozzles
