MXTOP 303

**Order and compactness
in large environments.**

www.vdm.it

MXTOP. The line
of trolleys **which**
grants high order
and safety standards
to the **operators in the**
professional cleaning
sector.

It is a line designed and realized for the Operators requiring a multifunctional trolley well structured so that all the necessary tools are always at hand.

Each model is ergonomic, handy and functional, most suitable for the professional use, specifically in large environments.

A compact and functional design so that everything
is always at hand.

The structure has been designed to optimize its overall dimensions. The great compactness grants simple handling and practicality and the linear design gives a professional image both to the trolley and to the Operator.

The robustness of the materials, the central and side doors made of polycarbonate grant stability when the trolley is fully loaded.

Everything in order thanks to **unique details.**

The **innovative solutions** together with the ergonomic design optimize and **simplify the daily work.**

BAG HOLDER

- Roll holder
- Divider for duo bag holder
